

# FLOWMETER SPARES KITS

TESTA Analytical liquid flowmeters are trusted tools used by chromatographers all around the world to ensure the performance of their HPLC system and fluidic assemblies. Unfortunately, in daily lab work, it is not uncommon for a device fitting or a length of required tubing to go missing and thereby prevent users completing important time-critical tasks. To then have to identify the correct replacement and part number can be time consuming and waiting for the delivery of the correct spares frustrating and unproductive.

To address the need for correct spares available when you need them – TESTA Analytical has introduced competitively priced spares kits related to its complete range of liquid flowmeters. Available on short delivery times, the kits are the best approach to ensure that your TESTA Analytical LC Flowmeter,  $\mu$ -Flowmeter, Semi-Prep Flowmeter, and Prep Flowmeter are kept running at their best.

Explore our comprehensive range of kits:

Flowmeter Model	Type of Kit	Part.No.
AB-40001 (LC Flowmeter)	Tubing Kit	AB-40201
	Fitting Kit	AB-40301
AB-40002 (Semi-Prep Flowmeter)	Tubing Kit	AB-40202
	Fitting Kit	AB-40302
AB-40003 (Prep Flowmeter)	Tubing Kit	AB-40203
	Fitting Kit	AB-40303
AB-40004 ( $\mu$ -Flowmeter)	Tubing Kit	AB-40204
	Fitting Kit	AB-40304

**Note:** Please check the calibration certificate of your flowmeter to confirm the model you're using.
